**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimasaki et al (6257176) in view of Vanderpoel (6422186).

Shimasaki et al show a rocker assembly having a cavity at 59, a first piston 52, a pin 53, a spring at 54, a first follower arm 24, a second follower arm 25, and valve stems 16. However, there are no hydraulic lash adjustment devices. Vanderpoel disclose (figure 2) a lash adjustment device including a spring and piston which contacts a valve stem 1. The lash adjuster is selectively (dis)engageable for compression release or exhaust gas recirculation; therefore, it would have been obvious to one of ordinary skill in the art to use the lash adjuster device of Vanderpoel in Shimasaki et al.

***Allowable Subject Matter***
